MALAYSIAN WOOD-BASED FURNITURE

Robust , Attractive and Trendy

Malaysian wood-based furniture is much sought-after by home, resort and property project owners around the world. The use of high-quality materials and timber species such as Rubberwood, Balau, Kembang Semangkok, Nyatoh, Dark Red Meranti and Acacia along with the application of hi-tech manufacturing methods and designs ensure the acceptance and admiration of Malaysian furniture in the international marketplace.

Over the decades, Malaysia's furniture industry has evolved robustly to become a major producer and exporter of furniture to more than 180 countries worldwide. With an annual export value of about USD 2.5 billion, Malaysia is placed among the top largest furniture exporters in the world. In Asia, it is among the top three. Wooden furniture accounts for about 83 per cent of Malaysia's total furniture exports, of which, the US is Malaysia's largest market with an import value of USD 1.7 billion in 2021.

By utilising the latest advances in technology, the industry has expanded its capacity to cater for both, small batch orders as well as high volume serial production. To enhance product value, manufacturers are moving towards originality of ideas and creative designs, which have further improved the marketability of Malaysian-made furniture.

Today, Malaysian furniture is showcased in all major furniture fairs in cities throughout the world. Come every March, Export Furniture Exhibition (EFE) offer an extensive range of furniture to cater to the wide-ranging styles and preferences of consumers from the world over.
